SUMMARY

AI/ML Engineer with strong experience in building production-grade systems across **Generative AI, Computer Vision, and NLP**. Proven ability to design end-to-end ML pipelines, develop scalable LLM applications, and deploy real-world AI solutions. Skilled in **LangChain, RAG systems, Hugging Face, and modern backend frameworks**. Focused on delivering high-impact, data-driven products with measurable outcomes.

WORK EXPERIENCE

PAN Science Innovators | LLM Engineer Intern

Aug 2025 - Present

- Built **Nyaay AI** ([LINK](#)) modules like - a legal RAG-based system featuring an intelligent legal chatbot, automated legal research workflows, customizable domain-specific bots, and a judgment finder for precise case law retrieval and contextual reasoning.
- Built and optimized **Council CRM** ([LINK](#)) — an AI-integrated CRM platform for managing workflows, customer interactions, and operational insights.
- Developed **OpticAll AI Agents** ([LINK](#)) — An AI-powered platform that analyses customer-agent call audio to extract actionable metrics and visualize performance insights through interactive dashboards.
- Designed and built **The Benchmark Hub** ([LINK](#)), a large-scale LLM benchmarking and AI Playground platform to evaluate accuracy, latency, hallucination, and domain robustness.

Aura AI | Artificial Intelligence Intern

Jun 2024 - Sep 2024

- Developed deepfake detection systems using **CNN + XceptionNet** architectures.
- Built **SRGAN-based super-resolution** models improving image clarity by 4x.
- Engineered Generative AI applications using **Stable Diffusion + ControlNet** with deployment via **Streamlit and FastAPI**.

PNB Housing Finance | Sales Force Intern

Oct 2024 - Nov 2024

- Optimized **Loan Management System (LMS)**, reducing manual workflows and improving processing efficiency.
- Worked with **REST APIs, database systems, and backend integrations** for financial applications.

PROJECTS

- AI-Powered EDA Agent** [Github](#)
 - Built an autonomous agent for exploratory data analysis using LLMs, Pandas, and Scikit-learn.
 - Automated insights generation and anomaly detection, reducing manual effort by 60%.
- Indian Landmark Classification System** [HuggingFace](#)
 - Created an ensemble model using ResNet50, EfficientNetB3, and Vision Transformer.
 - Trained on 9k+ images across 14 categories and deployed on Hugging Face Spaces.
- Multi-LLM SEO Optimization Agent** [Github](#)
 - Built a YouTube SEO automation system supporting OpenAI, Gemini, Groq, and Ollama.
 - Automated title, description, caption, and thumbnail generation.

EDUCATION

2022 - 2026	B.Tech Artificial Intelligence & Machine Learning , Maharaja Agrasen Institute of Technology (CGPA: 8.64/10)
2019 - 2021	Higher Secondary (Class 12, CBSE) – N.K. Bagrodia Public School (91%)
2017 - 2019	Secondary (Class 10, CBSE) – N.K. Bagrodia Public School (91%)

PROFESSIONAL CERTIFICATIONS

Machine Learning Specialization – DeepLearning.AI & Stanford University
Deep Learning Specialization – DeepLearning.AI
Advanced Generative AI with LangChain & Hugging Face – Kris Naik
Agentic AI Development Bootcamp – Kris Naik

TECHNICAL EXPERISE

ML & AI	Transformers, GANs, YOLO, CNN Ensembles,
Data Science	Pandas, NumPy, Matplotlib, Seaborn, Tableau, PowerBI, SQL, Scikit-learn
Computer Vision	Object Detection, Super-Resolution, OpenCV
LLMs	LangChain, LangGraph, Hugging Face Transformers, RAG, Prompt Engineering, Google SDK, OpenAI SDK
Deployment & Cloud	Docker, Streamlit, FastAPI, Google Cloud, AWS
